bus and coach: an efficient move for our future!

Buses and coaches are vital contributors to public transport, tourism, job creation, economic growth, social cohesion, energy savings, a cleaner environment and road safety.

Thanks to their **unparalleled flexibility**, they ensure **smooth multi-modality** by taking commuters or travellers from point A to point B, sometimes with a connecting plane or train.

They are excellent at **creating millions of jobs** for drivers, mechanics, manufacturers, companies, tourist agencies, the hotel and food industry and retail stores.

For many people, including those who do not or cannot drive, **buses and coaches are also lifelines to work, education, health and leisure.**

Enjoy the ride? Join the Smart Community and spread the word!
